

PLASTIC & RUBBER

Application: calendering line for rubber

SUPPLY: Hydraulic power unit for the control of a 4-roll calender for rubber

CHARACTERISTICS OF THE SYSTEM:

- 400 liters tank with drip tray for oil leakages
- Main line equipped with a 18,5 kW motorpump group and with a VPPM variable piston pump for the power supply of 6 hydraulic blocks that control position and force of the calender rolls
- Accumulator array for emergency operation, even in case of power failure
- Two secondary 5,5 kW motorpump groups, for the power supply of secondary lines: precharge, cross-axis and roll bending
- Independent oil recirculation line equipped with filter and heat exchanger
